

Özkan Needle Valve

Dam discharge, flow control, and pressure reduction, Ozkan Needle Valves are flow control valves for high differential and cavitation control.

TECHNICAL GUIDE: **VH8.4**

Applications

Reservoir inlets
Flow control
Pipe burst safety valve
Treatment plant flow control
Pressure regulating
Turbine by-pass

Product Attributes

High differential flow control
Cavitation control
Linear control characteristics
DN 200 – 1400
PN 10 - 40

Approvals/Standards

Flanges to EN 1092-2 as standard
Other flange standards available

Quality

ISO 9001:2008 Quality Management Standard

Needle valves are designed to manage flow control for continuous operation. Water flow is guided in a ring shaped cross section from inlet to discharge port. This allows the valve to control flow, pressure and high differential in various applications while preventing cavitation damage.

Design properties

FIG. 1

1. Optimised body design for better flow guiding and minimum head loss in full open position
2. Single piece compact body
3. Maximum service life due to the cavitation-free location of seal ring
4. Drive shaft supported on both sides in lubricated maintenance free bushings
5. Stainless steel internal parts and fittings
6. Wear and corrosion resistant bronze weld overlay-finished piston guides
7. Double O-ring sealed shaft
8. Optional control devices for optimum cavitation-free control requirements
9. Field replaceable seat ring-requires no special tools
10. Fusion Bonded Epoxy coating

FIG. 2

FIG. 3

- The piston and crank mechanism are located in a teardrop shaped internal body.
- The piston is axially guided inside the internal body and linear movement of piston changes cross-section.
- The piston is driven by crank mechanism which transforms rotational movement of gearbox or other actuation devices to linear movement.

Material properties

FIG. 7

TABLE 1

Part No.	Description	Material
1	Body	Ductile iron EN-GJS-400-15
2	Piston	Stainless steel 1.40301
3	Seal	Rubber NBR
4	Hex. Socket head cap screw	Stainless steel A2
5	Cap	Ductile iron EN-GJS-400-15
6	Connecting rod	Stainless steel 1.4021
7	Piston hub	Stainless steel 1.4301
8	Bearing bush	Bronze G-Cu Sn12
9	Key	Stainless steel 1.4021
10	Crank	Ductile iron EN-GJS-400-15
11	Crank pin	Stainless steel 1.14021
12	Circlip	Stainless steel 1.4301
13	Bearing bush	Bronze G-Cu Sn12
14	Seat ring	Stainless steel 1.4301
15	Shaft bearing bush	Bronze G-Cu Sn12
16	Bearing bush	Bronze G-Cu Sn12
17	Nut	Stainless steel 1.4301

FIG. 8

FIG. 9

TABLE 2

Part No.	Description	Material
18	Seal ring	Rubber EPDM
19	Retaining ring	Stainless steel 1.4301
20	Shaft	Stainless steel 1.4301
21	Cover	Ductile iron EN-GJS-400-15
22	Hex. bolt	Stainless steel A2
23	Worm gear box	-
24	Hand wheel	-
